**Working together for your school...**

**Let's Get Digital**

**Not Just Internet Connectivity**

At SIPS, we are passionate about helping schools embrace technology; we know that this technology is only as good as its support.

SIPS work in partnership with LGfL to manage the installation and ongoing support for Let's Get Digital connections.

From day one, we coordinate the planning, survey, installation and migration of school's broadband connections. Having migrated numerous schools to a Let's Get Digital connection, you are in safe hands.

We work with you to determine what equipment you have and how it will be migrated to ensure switchover is seamless. Don't worry if you don't have all the technical details, our engineers will visit site to gather all the information required.

**Don't just take  
our word for it...**

**SIPS really understand  
Schools and what they need,  
that's what sets them apart  
from other alternatives.**

Mrs Lucy Bray - Mesty Croft Academy

Once migrated, our dedicated helpdesk are available to help you get the most from your Let's Get Digital Connection.
